

The Ultra Dimensional Mobile Video Wall

Video Communication, the in Vienna located equipment specialist, presented at the Infocomm Europe for the first time a 44 m² daylight capable *SuperSCREEN* video wall that can be set up in less than 30 minutes.

SuperSCREEN

At sports and cultural events you need them and in concert business you couldn't do without them. Now the Vienna based company Video Communication offers Europe's largest mobile video wall. The *XXL-SuperSCREEN* not only meets all open air event requirements, it is by far superior to standard video walls in terms of picture quality and functionality. Its most important feature is supreme daylight capability. Unrivalled luminosity of 5600 Nits and 16 million colors provide a sharply contrasted, brilliant picture to the spectators, even in bright daylight. With a screen size of 44 m² and an upper edge as high as 9 m excellent visibility can be guaranteed from great distances. 550,000 precisely mounted LEDs grant an absolutely line free picture as well as a maximum side viewing angle of 140°.

ScreenMOVER

The *SuperSCREEN*, a sensation by itself, comes to be the ultimate choice for open air application in combination with the unique *ScreenMOVER*. With the *ScreenMOVER*, a custom-made truck, the *SuperSCREEN* can be built up in less than 30 minutes by means of a hydraulic lift that can also rotate the screen by 180°. As long as you can drive there the *SuperSCREEN* can be used at any location. The *ScreenMOVER* is equipped with an integrated power unit that makes it independent of external power sources. And the weather is no problem, either. The *SuperSCREEN* withstands rain and wind loads of up to 103 km/h (11 Beaufort). Flexibility and versatile usability guarantee the success of this new technology at any event.

All further details concerning the *SuperSCREEN* or the *ScreenMOVER* will be gladly provided by:
